## **DETAILED ACTION**

### ***Response to Amendment***

1. The Amendment filed on December 01, 2005 has been considered and made of record. However, Applicants have amended the claims, the previous election/restriction is withdrawn and a new election/restriction is issued as below:

### ***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-15, drawn to an apparatus for positioning back-up pins on a support plate, classified in class 29, subclass 739.
  - II. Claims 16-23, drawn to another apparatus for positioning back-up pins on a support plate, classified in class 29, subclass 760.
  - III. Claims 29-35, drawn to a method of positioning back-up pins for supporting a circuit board, classified in class 29, subclass 832.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the invention of Group I does not require the pins having a magnet portion at

Art Unit: 3729

least a lower portion thereof; marking on the top surface; and/or different diameters as require in the invention of Group II. The subcombination has separate utility such as positioning the back-pins on the planar surface of the magnetically plate.

4. Inventions of Group III and Groups I-II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process invention III can be practice by another materially different apparatus such as one comprises a control unit having a monitor. Further the step of transferring and positioning pins can be practiced by hand.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the search required for Group III is not required for Groups I-II and Group I is not required in Group II, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. No telephone call was made to Attorney of record since Applicants have amended the claims in replied to the previous election restriction dated on 10/28/05.

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Donghai D. Nguyen whose telephone number is (571)-272-4566. The examiner can normally be reached on Monday-Friday (9:00-6:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter D. Vo can be reached on (571)-272-4690. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
